A cohort study of 111 styrene-exposed workers in the vicinity of a styrene manufacturing plant was initiated in 1989. A total of 258 blood samples were collected from workers who were followed from 1989 until 1993 for leukemia, non-

Hodgkin lymphoma, and other cancers. Histological confirmation of non-Hodgkin lymphoma was available for 71 of the tumors. A total of 12 peripheral blood samples were collected and DNA was extracted from peripheral blood leukocytes. In all, 58 DNA samples were successfully genotyped for the polymorphic base adenine-thymine (A-T) or guanine-cytosine (G-C) repeat at codon 12 2d92ce491b
