

Videohive Wedding Pack - After Effects Project

By cocoPlays.net This video is free to use and no download is required. Wedding Pack After Effects templates \$9 After Effects project, extend, user friendly, after effects cs5, cs4, cs3, cs2, cs1, avi, mov, xmp, flv, mp3 After Effects is a compositing and effects-based motion graphics and animation software. It is produced by Adobe Systems and the software is available on both Windows and Macintosh platforms. After Effects was first released in 1996 as part of Adobe's Premiere product suite and was initially called "AE", but later in 2007 the product was renamed to its current name after Adobe released a new timeline for After Effects known as the "New Comp tool". After Effects enables users to create visual effects such as special filters, transitions, and graphics such as logos and animations. An image placed into the timeline can be animated by moving it in relation to other layers. After Effects is typically used in the production of motion graphics and video content. The most powerful feature of After Effects is its ability to create visual effects by using transitions, layers, filters and layer styles. It is the backbone for most of the motion graphics and animation in today's Internet. Wedding Pack AE is a solid After Effects project by StudioOs. It's a wedding themes and ideas project for creating customized After Effects project for your wedding films. Now you can make more than a simple couple wedding project as your are creating a unique video for your wedding. You can have a wedding film that can be used in promoting your wedding films or in your website. . Wedding Pack AE is a flexible After Effects project, well organized with keyframes. Project comes with two scenes, wedding introduction and wedding night scene. The first scene is simply an introduction scene in which you can create a simple scene with decorations like wedding background, table settings with cake, wedding photographer, big bouquet and wedding party. In the second scene, there are many animation and effects that you can include in your project for your couple wedding film. . This project is editable and you can easily modify as per your requirement, well organized with layered compositions. You can have a great and unique wedding film without any cost. . Below are the main features of this After Effects project:
