Something like this; /You did not enter a value in the State field. I have a model like this; def __unicode__(self): return self.name class Person(models.Model): email = models.EmailField(max_length=200, unique=True) name = models.CharField(max_length=200) address = models.CharField(max_length=200) phone = models.CharField(max_length=20, blank=True, null=True) website = models.CharField(max_length=200, blank=True, null=True) state = models.CharField(max_length=50, blank=True, null=True) latitude = models.DecimalField(max_digits=15, decimal_places=5) longitude = models.DecimalField(max_digits=15, decimal_places=5) date_created = models.DateTimeField(auto_now=True) date_updated = models.DateTimeField(auto_now_add=True) country = models.CharField(max_length=50, blank=True, null=True) #this is where I want the default error message def __repr__(self): return self.name A: You could write a custom clean method for your model in which you check to see if the state is blank.
