This feature allows you to undo or redo any geometric or attribute operation. You can even undo the operation of the tool you used to create a drawing or it may be all of them. You can undo the feature of the feature and more. The History feature is another example of what the industry is coming to call the “SketchUp revolution.” Specifically it is the revolution that is starting to kill AutoCAD.

If you use or saw AutoCAD, you may wonder how the two applications compare. Let's compare one more time: AutoCAD versus SketchUp. Also, SketchUp for example, has the best BIM (Building Information Modeling) functionality to allow an architect to show a client a digital rendering of a building. The client can then walk around in the 3-D model and really see how the design of the building will look when completed. On top of the amazing functionality of SketchUp to show the ba244e880a
