ENJOY THE NEW WEBSITE "favour2" A: The first thing you'll notice in your code is that you're using the 1.2.3.4 version, and then that the 1.2.3.5 tag is missing from the subsequent messages. So, your usage of version 1.2.3.4 is likely the culprit, which looks like: Itactil lider 9 1 23 The 1.2.3.4 refers to the tag version. The 2.3.5 tag is simply missing, you'll need to fix that, and then update your code so that when the next one comes in, you have a proper tag as well. One other thing that will be clear is that your tag is opening and closing in the wrong places. You have two opening and two closing in succession, which is not the

correct syntax. Other comments in your code: Your links are missing the "#" character, that will prevent any navigation in your browser. You're using too many tags and not using the tag properly. I don't know the specifics of your project or what you're trying to accomplish here, but the fact that you're using 15 tags is a little bit excessive. You have all of your other tags as . I'm not sure what your intent was with that, but your browser will ignore the tags if they don't contain any content, so the content that you are looking for is at the end of the tag. The lack of spacing in your source code will make it much harder for people 2d92ce491b
