routers are designed for China, and you will find most of the bigger Chinese online shops only sell to China customers. Therefore, you may find some very strange Google and Xiaomi and Huawei and other brands will only support China customers. It may be totally normal and understandable that some producers targeted their business at China customers, so they only support Chinese 5G band. But we can't rule out the chance that the 5G band China routers will not support other country.

Q: How to add data from a SerialPort to a textbox I am trying to connect to a serial port and add data to a text box. The serial port is listed as MBI and it is listed as COM3. How can i open this port? I am using Visual Studio 2010 for a windows form.

Thanks, A: Try this. SerialPort is a class in .Net framework. // Open the serial port

asynchronously. `SerialPort port = new
SerialPort("COM3", 9600);` // It is important
to specify the correct port number
